

Acronis® Backup & Recovery™ 11 Server for Windows

Acronis® Backup & Recovery™ 11 Server for Linux

Acronis® Backup & Recovery™ 11 Workstation

For Small Business Environments where Centralized Management is not a Requirement.

Acronis Backup & Recovery 11 is the next-generation of disaster recovery products from Acronis with standalone solutions designed to meet the needs of small businesses. The Acronis advantage centers around patented disk imaging and bare metal restore technologies that simplify all backup and disaster recovery activities in Windows and Linux environments. Today, failed machines have to be returned to operational status in minutes, sometimes seconds, rather than hours or days. Acronis helps businesses recover their systems quickly. Organizations can automate backup processes for workstations and servers, Windows and Linux, to local and online storage. After a disaster strikes, Acronis Backup & Recovery 11 restores servers, workstations or laptops to the same or different hardware or to virtual machines, providing highly flexible disaster recovery and migration options.

New and Improved Features

NEW! Simplified Workflows

Makes the product easier to use for small office environments

NEW! Disaster Recovery Plans:

Automatically generated each time a backup completes, containing step-by-step instructions in case an IT administrator is not available

NEW! Improved Core Disaster Recovery Features:

- 4KB sector disk support
- Backup and recovery of systems that use UEFI
- Backup and recovery of GPT disks, including those larger than 2TB

NEW! Improved Reliability with Multi-Destination and Acronis Online Storage:

- Direct (D2C) or indirect (D2D2C¹) to the cloud
- Store backups in two, or more, locations for redundancy

NEW! Improved Support for Linux Environments:

- Ability to restore to dissimilar hardware
- Ability to restore Linux servers that use Logical Volume Manager (LVM)

NEW! Improved Alert System:

For easy monitoring and troubleshooting of all backup and recovery operations

¹ Available in an upcoming release

Core Features

Flexible, Efficient Backup:

- Live backup of the operating system, applications and all data in minutes
- Block and file level backup of either the entire disk/volume or selected files/folders
- Fast incremental and differential backup compare only by file size and modification date/time instead of comparing the entire file contents
- Multi-destination backup – store backups in two, or more, locations for redundancy

Fast Restore of Operating System, Applications, Files and Data:

- Easy recovery to the same or different hardware, including virtual machines, with Acronis® Backup & Recovery™ 11 Universal Restore™ option
- Installs without reboots
- Use recovering systems while data is being restored with Acronis® Active Restore™
- Enables mobile laptop users to recover a machine on the road from Acronis® Secure Zone®

Support for Virtualized Environments:

VMware®, Microsoft®, Citrix®, Red Hat® and Parallels® virtual machine (VM) support

Acronis Universal Restore for Bootability:

When replacing hardware, can patch OS directly without performing backup and restore

High Level of Security:

User authentication and government approved (AES-256) data encryption secure storage, data access and transmissions

Supported Operating Systems

Workstation:

Windows 7, Windows Vista
Windows XP Professional SP2+
Windows 2000 Professional SP4+

Server for Windows:

Windows 2000/2003/2003 R2/2008 /2008 R2 Server
Windows MultiPoint Server 2010
Workstation operating systems above

Server for Linux:

Red Hat Enterprise Linux 4.x and 5.x
Ubuntu 9.04, 9.10 and 10.04
SUSE Linux Enterprise Server 10 and 11
CentOS 5, Debian 4 and 5, Fedora 11 and 12
Linux with kernel 2.4.20 or later and glibc 2.3.2 or later

Acronis® Backup & Recovery™ 11 Workstation

For Small Business Environments where Centralized Management is not a Requirement.

Customer Benefits

Data Availability and Application Uptime

Acronis Backup & Recovery 11 provides local and online backup and disaster recovery to meet Recovery Time Objectives (RTO) whether workstation or server, Windows or Linux. Quickly recover to dissimilar hardware or to a virtual machine. Plus, your data is safe with secure, encrypted backup.

True Ease of Use and Manageability

It's so simple to use that even novices can create sophisticated backup and recovery plans. Be productive immediately with the same user-friendly console for local and online protection. Recover quickly and easily with automatically generated disaster recovery plans.

Lower TCO

Grow with us. Acronis Backup & Recovery 11 is simply one solution from one vendor for physical, virtual, and cloud. No new training is required.

Unique Selling Points (USP)

- One solution, one vendor for physical, virtual and cloud
- Optional cloud-based data protection for offsite protection against disaster or theft
- Ability to restore both Linux and Windows systems to dissimilar hardware and to recover servers that use UEFI and GPT
- Support for five hypervisors: VMware, Microsoft, Citrix, Red Hat, Parallels
- So simple to use that even novices can create sophisticated backup and recovery plans
- Automated generation of disaster recovery plans per specific customer configuration to improve ease-of-recovery and Recovery Time Objectives (RTO) while decreasing user error

Market

Acronis Backup & Recovery 11 addresses the needs of the two main markets:

- **Disk Imaging Backup and Recovery** – which allows you to capture an entire operating system, including applications, to enable fast recovery of entire systems in the event of disaster
- **Ability to recover individual files** – from image backup

The emphasis in this market is on recovery, with organizations looking for solutions that improve Recovery Point Objectives (RPOs) and Recovery Time Objectives (RTOs) combined with ease-of-use to avoid training and reduce Total Cost of Ownership (TCO). Plus, risk of downtime is great. 52% can only tolerate 1 hour or less.

Competitor Products

- Symantec Backup Exec System Recovery
- CA ARCserve D2D
